

Handle misalignment, contamination and high speeds

SKF self-aligning ball bearings are ideally suited for the demands of textile processing.

Features

- Self-aligning up to a maximum of 3° depending on series and design
- Virtually no risk of sliding during start-ups and light-load conditions
- Extremely low friction offers minimum operating temperature combined with high speed capability
- Sealed versions provide robust protection in harsh environments
- E design bearings with optimized internal geometry offer maximum load capacity

Benefits

- Long and reliable bearing service life
- Lower maintenance and operating costs
- Increased uptime and productivity
- Increased energy efficiency
- Reduced vibration and noise
